#### MINIATURES

We can supply a limited number in red, white or pink. \$1.25 doz. any size.

(ASK FOR IT, if you don't see it on the list)

#### Simple Rules of *GLADIOLUS CULTURE*

1. Glads do best in full sun and must have at least a half-day when the sun can reach them.
2. Any good garden soil will grow glads. Rotted manure is desirable. Use a side dressing of commercial fertilizer (3-10-10) when bulbs are up.
3. Plant six inches deep. Space the bulbs so the crowns are four inches apart in the rows.
4. After the plants have the fourth leaf they need to be kept wet till the florets are open.
5. Hoe, weed and cultivate, the more the better.
6. Use a water soluble DDT 5% spray or 5% dust once every two or three weeks from the time the glads start to grow to control thrips.
7. It is best to soak bulbs before planting. Soak 4 hours in solution of 1 tablespoon of Lysol to 1 gallon of water.

When shipped by us these bulbs are true to name, sound, healthy, and well packaged. As we have no control over the bulbs after they leave our hands, we are not responsible for the crop. We will be liable only for the purchase price of the bulbs.
